## LOAD &amp; SCAN WINE

- Load your wine bottles with labels facing the front of drawer. Bottles loaded in the left column of the drawer will be stocked to WineCab's Display Column.

*Note: Bottles must be positioned correctly to ensure they are scanned and stocked properly.*

- Tap **CLOSE DRAWER**.

- Select a stocking method.

**AUTOMATIC** places bottles in the WineCab based on your preset Zone Parameters (you can adjust these parameters in **SETTINGS**). The load process is complete.

**DISPLAY COLUMN** places bottles in the Display Column, with any remaining bottles placed based on your preset Zone Parameters.

- If you selected **DISPLAY COLUMN**, you will be prompted to choose spaces for your bottles. Tap a bottle (gold circle) in the black column to select it, and choose an available space (grey circle) in the Display Column for its destination. You should see the bottle and destination connected by a line and highlighted.

- Repeat step 6 for each bottle shown in the black column. When all bottles have a destination chosen, tap **LOAD BOTTLES**.

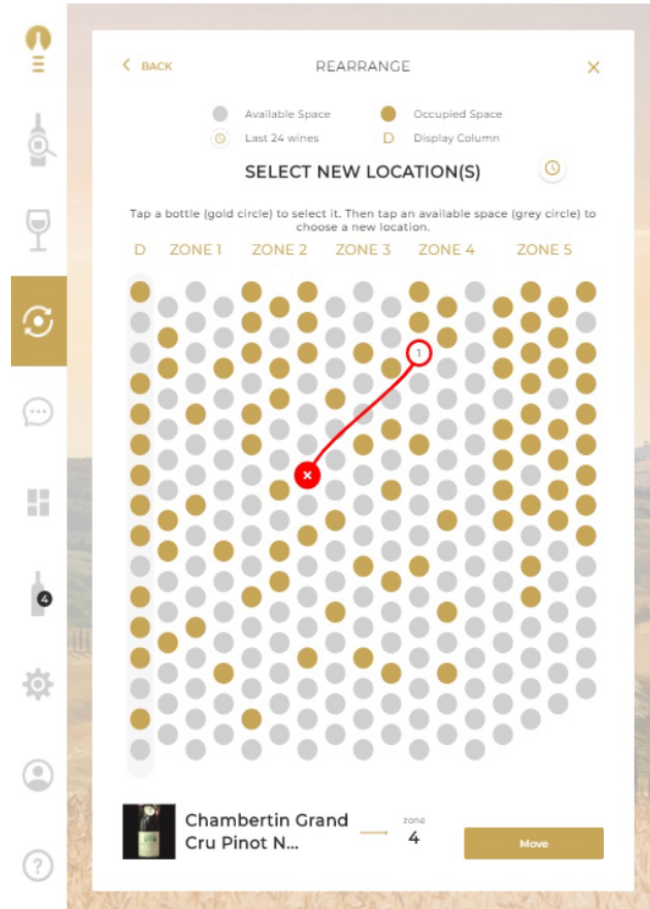

< BACK

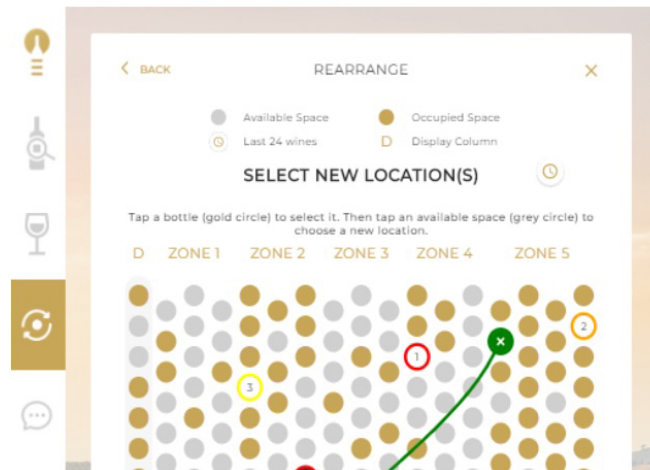

## REARRANGE OR MOVE BOTTLES

- Your wine bottles are shown as gold circles. To see your recently loaded bottles, tap the clock icon. Tap the bottle you want to move, and then select an empty space (grey circle) as its destination. The bottle's current space and new space will be shown with a line between them. If you want to cancel the move, tap the X on the selected bottle.

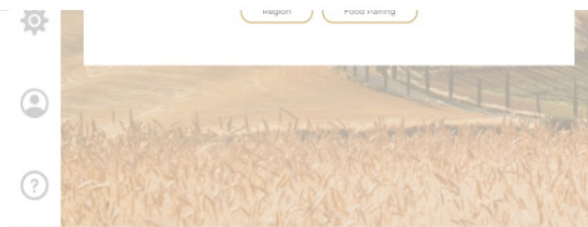

- Repeat step 2 for each bottle you want to move. You can rearrange up to 99 bottles at once.

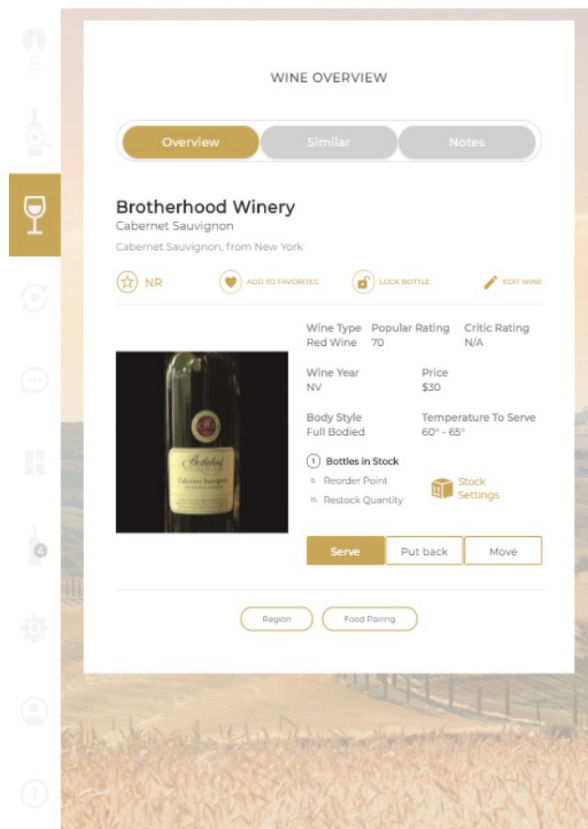

< BACK

## PRESENT A BOTTLE

4. Once the bottle is presented, you can put it back, serve it, or move it.
  - a. To return the bottle to its space, tap **PUT BACK**. Presenting the bottle is complete.
  - b. To serve the bottle, tap **SERVE**.
  - c. To move the bottle, tap **MOVE**.

*NOTE: If you do not choose one of the options above within 60 seconds, the WineCab Robot will automatically return the bottle to its space.*

5. To serve your wine, the WineCab Robot places the bottle in the Dispenser Cup and opens the Front Door. Follow the App Screen instructions or see [Serving Your Wine](#) for more details.
6. To move your wine, choose a grey (empty) space for the bottle's destination and tap **REARRANGE OR MOVE BOTTLES**. See [Rearranging or Moving Bottles](#) for more details.

## SELECT & SERVE WINE

This function allows you to add or edit wine information for recently loaded bottles, or choose wines from your inventory to present or serve.

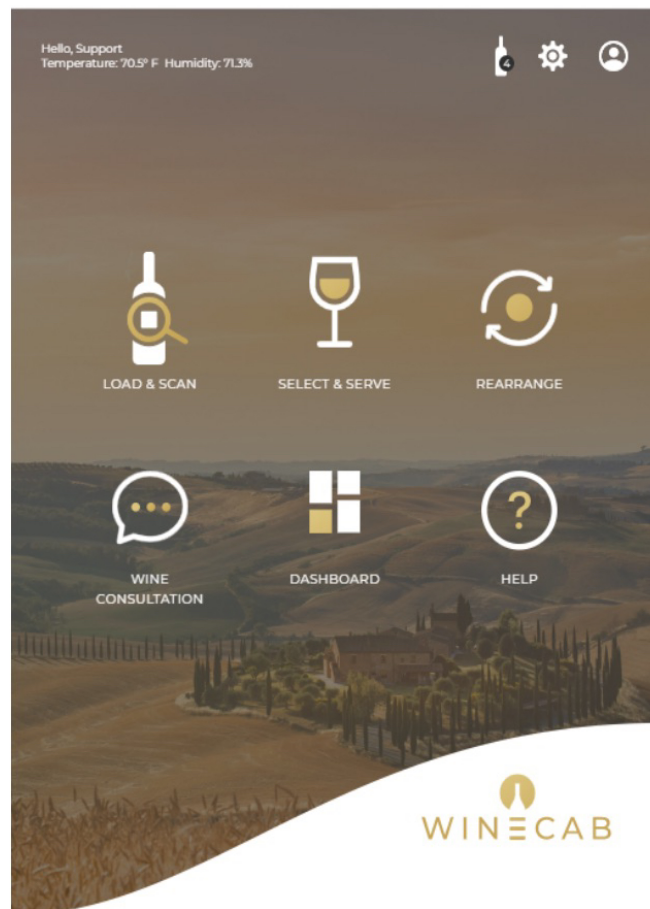

### Search Your Wine Inventory

The Wine Inventory contains information about all the bottles stored in your WineCab. When you load a new bottle, the WineCab Robot scans it and gathers information from our database to create a Wine Profile for each wine in your inventory. The Wine Profile includes a Wine Overview, Critic's Notes, food pairing suggestions and, if desired, your own notes and rating for the wine.

You can search for the desired bottle with the **FILTER**, by typing text into the **SEARCH BAR**, or using the icons at top right of the screen to browse your **FAVORITES**, **DISPLAY COLUMN**, or **LAST 24** loaded wines.

### Search by filter:

1. On the WineCab HOME screen, tap the **SELECT & SERVE**  icon.

2. Tap the **FILTER** button to display the **WINE TYPE** and **GRAPE VARIETY** options.
